Conservation, Interpretation and Use

Interpretive Services: Interpretive Services to the public were discontinued November 1.

Park Naturalist Marler presented a program to the Lions Club of Rexburg, Idaho, on November 16. Topic: Yellowstone's Geysers in Winter.

North District Naturalist Cross presented an illustrated lecture program on Yellowstone to 250 students of the Elizabeth City Junior High School at Elizabeth City, North Carolina, on November 15.

Assistant Superintendent Nelson and Historian Haines attended an open meeting of the Fort Benton Kiwanis Club on November 20. Mr. Haines

Interpretive Services (Cont'd.)
gave a talk before members of the organization to explain the significance of the town's historic landmark status.

Superintendent Garrison, Assistant Superintendent Nelson, and Historian Haines attended a ceremony at the Governor's Office in Helena, Montana, on November 19 for the presentation of a certificate designating the City of Fort Benton a Registered National Historic Landmark. (Photo attached.)

While in Fort Benton on November 20, Mr. Haines made a black and white photograph of Chief Joseph's Winchester rifle and ceremonial robe for Yellowstone's collection.

On November 8, Acting Chief Park Naturalist Good participated in a panel discussion before the Montana Association of Soil and Water Conservation District meeting in Livingston on "Conservation Policies Recreation."

Research and Observations: A second major eruption of Steamboat Geyser this year, occurred during the night of November 15. In the morning of November 16 Steamboat was found to be in a violent roaring steam phase with a vapor column rising more than 1,000 feet above it. Muddy ice covered trees in a path over 100 feet from the geyser. By November 17, water had risen in the crater and Steamboat once again playing in its normal manner.

Fan and Mortar geysers first reported eruptions in 1962. During the current century there are no reports to the effect, or evidence, that the Fan and Mortar are erupting as frequently as during the latter part of the 1800's. An eruption of these geysers lasts from 10 to 15 minutes both playing in concert. Both are major geysers and in view of the fact that water plays from not less than 11 vents, the eruption is highly spectacular and impressive. In the early part of an eruption, Mortar goes into a powerful steam phase.

Joe Jonas, Denver taxidermist, is collecting a buffalo bull, an elk bull and an elk calf to be mounted for the Pennsylvania Natural Museum.

One collecting permit was issued to Robert G. Johnson, South District Naturalist, for botanical specimens.

Forest Fire Protection: Louis L. Gunzel, Forester (Fire Control) attended a Rural Fire Defense Convention meeting in Laramie, Wyoming, November 20. The purpose of the meeting was to establish a permanent working committee for Wyoming Rural Defense and to determine necessary procedures to assure adequate participation for a rural fire emergency.

Interpretive Services (Cont'd.)
gave a talk before members of the organization to explain the significance of the town's historic landmark status.

Superintendent Garrison, Assistant Superintendent Nelson, and Historian Haines attended a ceremony at the Governor's Office in Helena, Montana, on November 19 for the presentation of a certificate designating the City of Fort Benton a Registered National Historic Landmark. (Flyer attached.)

While in Fort Benton on November 20, Mr. Haines made a black and white photograph of Chief Joseph's Winchester rifle and commemorial rose for Yellowstone's collection.

On November 8, Acting Chief Park Naturalist Reed participated in a panel discussion before the Montana Association of Soil and Water Conservation District meeting in Livingston on "Conservation Builds Recreation."

Research and Observations: A second major eruption of Steamboat Geyser this year, occurred during the night of November 15. In the morning of November 16 Steamboat was found to be in a violent roaring steam phase with a vapor column rising more than 1,000 feet above it. Muddy ice covered trees in a path over 100 feet from the geyser. By November 27, water had risen in the crater and Steamboat once again playing in its normal manner.

Fan and Mortar geysers first reported eruptions in 1892. During the current century there are no reports to the effect, or evidence, that the Fan and Mortar are erupting as frequently as during the latter part of the 1800's. An eruption of these geysers lasts from 10 to 13 minutes both playing in concert. Both are major geysers and in view of the fact that water plays from not less than 11 vents, the eruption is highly spectacular and impressive. In the early part of an eruption, water goes into a powerful steam phase.

Joe Jones, Denver taxidermist, is collecting a buffalo bull, an elk bull and an elk calf to be mounted for the Pennsylvania Natural Museum.

One collecting permit was issued to Robert G. Johnson, South Dakota Naturalist, for botanical specimens.

Forest Fire Protection: Louis L. Gerard, Forestry (Fire Control) attended a Rural Fire Defense Conservation meeting in Laramie, Wyoming, November 20. The purpose of the meeting was to establish a permanent working committee for Wyoming Rural Defense and to determine necessary procedures to assure adequate participation for a rural fire emergency.

Civil Defense: A Civil Defense practice alert was held November 1. Employees and families were assigned to emergency shelters at Mammoth and Shelter Captains designated, but there are many problems to be worked out.

Range: Forester Marion W. Myers met with Don Lyngson, Extension Range Specialist of Montana State College, on the Park to discuss methods to eliminate the exotic plant, butter and eggs (Dalmation toadflax) from the Yellowstone Range.

Concessioners: Visitor accommodations and facilities were closed for the season on November 1 when Yellowstone Park Company closed old Faithful Inn and Hamilton Stores closed their Lower Service Station at Old Faithful.

Victor Hjelm, painter, retired after more than 30 years of service for Yellowstone Park Company. The Hjelms retired to Spokane, Washington.

Wildlife

Bighorn: Eight ewes and three rams were observed between the two bridges on the Mammoth-Gardiner road. As many as 23 bighorn have been observed at one time on Mount Everts.

Bison: The Texas Meat Company has taken out 15 buffaloes. Approximately 147 bison moved into the lower Hayden Valley during the last few days of the month. The largest concentration is around the Dragon's Mouth area. Trapping attempts have been generally unsuccessful this month (partly due to the unusually light snow pack.

Eagle: Bald Eagle are seen frequently around the Fishing Bridge area.

Elk: A total of 863 were counted in the Lamar area on the morning of November 27. Elk are moving down in the Gallatin and are visible from the road during the daylight hours. 28 were taken for Montana State College and State Game Department research studies.

Fox: A red fox was observed near Elk Creek on the Park.

Moose: Two moose were seen in the Lamar area on the morning of November 27.

Swan: As many as 27 Trumpeter Swan have been counted along the Yellowstone River from the outlet at Fishing Bridge. Six Trumpeter swan were seen on the Madison River on November 21.
